A Safeguard.

The total rapidity with which slight Cotils and Foughs frequently developint the gravest mainties of the threat and burgs, is a consideration withick should intel every prodent person to keep at land, as a homsehold remody, a bottle of AVER'S LITERITY PETTORAL.

Nothing cles glyes each humericate relief and works so sure a cure to all affections of this class. That emineral physician Frof. F. Sweetzer, of the Mathe Medical School, Hrumswick, Mc, 83981—

"Molleal celonec has produced no other anodyne expectivant so good as AVER'S CHERN PETTORAL, 114 Invaluable for diseases of the those and large."

The same continuous expressed by the

throat and lungs."

The same opinion is expressed by the weid-linuw Dr. L. J. Addison, of Chicago, iii., who says:—

"I have never found, in thirty-five years of continuous analy and practice of medicine, any presention of so great value as Ayrk-1 NEBBY [Ferrunal, for treatment of discusses of the troat and lungs. It ust only break up colds and curve severe coughs, but is more effective than anything close in relieving even the most serious bronchial and pulmonery affection."

AYER'S

ts not a new claimant for popular confidence, but a medicine which is looday saving the lives of the third generation who have come into being slace it was its offered to the jubble.

There is not a household in which this towardade remety has once been introduced where its use has ever been damboned, and there is not a person who has ever given it a proper triat for any threat or lung disease susceptible of cure, who has not been made well by its.

AYERS CHERRY PECTORAL has.

AYER'S CHERRY PECTORAL los.

Ayfars CHERRY PECTORAL has, in numberless instances, currel obsilitation and even acute Promotalis, Laryngillo, and even acute Promotalis, and base of Putatumiry Pousaumption. It is a medicine that only requires to be taken in small dosse, is pleasant in the faste, and to needed in every house where there are children, as there is nothing so good a AYERS CHERRY PICTORAL for treatment of Croup and Whoughing Gaugh.

These are all plain facts, which can be treitiful by anytody, and should be remembered by everybady.

for her home on Monday morning.

Self preservation is the first law of mature, but not so in the nature of our efficient engineer. Maynard, who has provided for the protection of others, before those of his own home. For some time there has been anxiety on the part of residents at the Corner, because there was no immediate protection from fire; but their fears are allayed in part since Mr. Maynard has brought to the corner a hose cart with 300 leet of hose. There should be at this place a suilable and permanent house for the free department; at present the hose is in Mr. Taylor's barn.

The home of Mr. Onliney Hollsrock. AN ACT

BELATING TO THE SEALING OF WEIGHT AND MEASURES. The home of Mr. Qalney Holbrook, on Pleasant St., was the scene of a very happy gathering of little folks on Pleasants inght. A tree had been beautifully trimmed and heavily laden from the stores of good Santu. The evening was spent in singing, interspersed with recitations and games.

Exchement in Texas
Great excitement has been cased in the vicinity of Paris, Tex., by the remarkable recovery of Mr. J. E. Corley, who was so helpless he doubt no turn in bed, or raise his head; everyhody said he was dying of Consumption. A trial bottle of Dr. King's New Discovery was sent him. Finding relief, he bought a large bottle and a box of Dr. King's New Lite Pills; by the time be inal taken two boxes of Pills and two buttles of the Discovery, he was well and had gained in tesh thirty-six pointies. Trial tables of this Great Discovery for Consumption of free at L. J. Pairce & Co's.

PASTEUR'S PROCESS.

The Newack Children - Evidenc of the A Paris disputely says: M. Pastour bronkfasted with President Grevy at the Elysee palaco recently. Despite the political crisis, the conversation turned upon hyderdiolin anthe topic events from the results of the conversation failed upon hydelphota and the president of the tepublic became very much interested in the cases recently reported from America, and nasked M. Pasteur all sorts of questions about the Newark chaldren.

Another remarkable proof of the efficiency of M. Pasteur's discovery is fundated by the case of three children of Tourcoing, near the heligian frontier. All were bitten by the same of go and there was a great discoursion mining the townspeople whether to send the children to M. Pasteur's miscourse was reached. The child that had be a most severely bitten was sent to M. Pasteur, and the other two, who had been bitten only slightly, remained at home. The wounds of all three had been thoroughly canterized immediately after the bites had been infacted. The two children that stayed at home died of nables that week, while the one which was treated by M. Pasteur is alive and well.

The manufacture of lease balls in this country has become un important inclustry, and an ingenious one, too, according to the description given of the process; First, there is a little hard rulder ball, around which there is wound a strong Idue coarse varu, and whea this reaches a prescribed size, it is firmly wrapped with chite Venetian yarn. The balls are now placed in an oven and laked until the oisture is taken out of them and they are reduced in size, this making them solid. They are then coated with cement, which causes the balls to retain their shape, and they cannot be knocked crooked. After this comes some tine ldue yarn, gilling twine. The balls are weighed, each to love a certain weight, and the covers are put on, these being made of pieces, each cut in the shape of the figure By Lending one section one way and

BIDING FOR A FALL. THE CITIZENS The Conservatives in Open Antago-A bondon dispatch says that the Britist government will rule for a fall on the litch question, in the hope of getting back into the raddle on the officer side of the fearer. They have decided to tempt detect on the diamou of through a factority. The proposal of repressive legislation is an open declaration of war against the litch parlamentary party. It means that the treat maders handing between Lord Randolph Churchill and Mr. Parriell is thrown extractionarily the ministry. Lord Randolph has maxed mountains to be quite trace in works may define the ministry and the family law of the ministry and the family law of the ministry of the trace in works and works to the contributions, but neither leader could control the more valent section on his side. Lord Randolph has been swamped by the trange apprising in I store. Personally, however, his yelations with Mr. Famel are BISMARCK AND THE POPE. The Prince's Letter to His Hollnes A sensation has been created in London by

the publication of the letter for Prince Bis-marck to the Pope acknowledging the remarch to the Pope acknowledging the re-cept of the decoration of the order of Christ recently conferred on the German Chancellor by his helmess. The letter commences by addressing the Pope as "Sire," and says, "Your kind letter and decoration have greatly gratified myself and the Emperor William". It then goes on to state that the Dope's words that the papery means to prac-tice the works of ponce first suggested to Prince Besnarck the idea of seeking the mediation of his holicess in the Dara-mes question, and, in deterence to his faith and microkends confidence in the Pope's elevated views and impartiality, he selected the Pope as the arbiter of the dis-Tamber of initial considerations that ender the Lord Randelph Chardell might have managed to seeme a continuouse of the arrangement with the brish party of a had not been for the stableomies of the Turker Tornes. The Tister men turied a deficient to his jersonal solicitation, and portfied Lard Subslaury that, indees the powerment took measures for the restoration of order in the districts, they would trustow their parhamentary support to Mr. Gardstone. That setfled if This accession of the first Tory vote would give the laberal in clear majority of 37 aver the Conservatives and Nationalists united. With so fatal a secsion in pair ped, the rabbinet saw there was nothing but an ignomination soverthrow to be repost from the maintenance of un understanding with Mr. Parnell, and now they have changed the policy of coordination to a policy of open antagonism to the Land Largtue. he selected the Pope as the arbitrer of the dis-pute. Germany and Sprin have no cause to somplain of the terms of the protocol, and the effect of the mediation will be lasting. Prince Bismarck will not neglect chances to attest his lively gratifule, highest devotion and deepest respect for his holiness in the future. The letter is signed "your very humble servant, Bismarck."

Driving at Night How to lliuminate a row! In front of the horsee in driving at night is an im-portant matter. The usual skile limps on entringes, or

The usual size lamps on earnings, or the stinching of a lantern to the dash board, fall to reflect the light where it is most wanted, not the suspending of a lantern to the front axle la objectionable for meny reasons, but it is the best plan for shedding the light where it belie most for shealding the light where it is like thost needed that we hove seen tried.

But a Philadelphia physician suggests the attaching of the fantiern to the breast feotlar of the harness, which has says be has Irled with perfect satisfaction; and lie has evidently last some experience with the ordinary methods of lighting, for he says the various forms of dash lights are presty much the same in that lights are pretty much the same, in that they put the light just where it is not wanted, illuminating the horse's tail and hips and the luggy thills with hrillance quite unnecessary, which intensifies the blackness of the slandow cost by them ust where one most wishes to see

just where one most wishes to see clearly.

"My light is a common tubular lantern, with a reflector, and a spring for attachment to the dash. In place of putting it on the dash. I slipped the apring over the michile of the horse. Every partectly in front of the horse. Every part of the road in front of me was plainly seen, so I could drive with as much conditions necessary for success are a level-header horse, with a fair breadth of cliest, and shoulder strap attached to the check and shoubler strap attached to the check and shoubler strap atturbed to the check hook, to prevent the lanters sagging down between the horse's legs when for any reason the braces alack. It would be well to have a strap sewed to lie inside of the breast collar, to slip the spring through, so as to prevent ony lateral motion,—Scientific Austrian. A Gentle Silaiales

One of the wonders of the South is the revivalist and temperance lecturer Sam Jones. He is already attracting the attention of the whole country. He is very eccentric. He creates a sensation everywhere but there seems to be very much to the man. His terse way of putting things, his humor and great carnestness seem the secret of his power. He will no doubt have many imitators, but no man is likely to succeed at it. One might as well attempt to compete with Solomon in making proverts. A young man who had a great admiration for the eloquence of Peter Cartright proposed to cupy his style, but, said the eccentric Cartright, "you will go to the devil if

A SPY IN THE CAMP.

BY AN EX-CONFEDERATE,

In the winter of 1864, when Johnston's missing, army lay at Dalton in winter quarters, 1 made two or three excursions in the direction of Chattanooga, picking up more or less valuable information, and was resting after one of these raids when the ncident I am about to relate occurred, That Yankee spies were penetrating or three had been arrested, but it was only two or three out of a dozen, and orders had been issued to all regimental All the scouts had, as a matter of course,

lined watchfulness. One afternoon, while sitting in the parters of an old friend belonging to a brigade band, a crowd gathered outside, and I heard the music of a fiddle. Stepping to the door, I saw a German about ing the fields in a rude sort of a way as if entirely unmindful of their presence. The man was in citizen's clothes, and for what seemed a very good reason. His right arm had been amputated at the elbow. I looked him over closely as he sat there, eyes half-closed and keeping time with his foot, and I could not say that I Give as a song, cried a dozen men in

The Thompson Mob.

A writer in the North Ablagton Public, who was an eye-witness of the mobbing-of George Thompson, the anti-slavery speaker at Ablington, in 1835, says that the hell rope was large and long, so there was no lack of rope for the mobocratic purposes, which was to draw Mr. Thompson by means of a noose in the hell rope, from the pulpit through the window into the mereliess hands of the mod, some of whom fostered hitter prejudices against an Englishman as well as toward the sheet. The man who had agreed to thruw the slip-noose over Thompson's head, inding that he could not effect his object without exposing himself to the gaze of the heariers, backed down, and no one else could he found to fill the place, and being energy large vestry lamp full of oil and thing it with great violence through the window at Mr. Thompson, the lange striking the pulpit by his side, breaking striking the pulpit by his side, breaking the window at Mr. Thompson the the westry, had aroused the speaker's hearers for his safety and the meeting striking the number of pulpit hy his side, breaking the vestry, had aroused the speaker's hearers for his safety and the meeting and the vestry, had aroused the speaker's hearers for his safety and the meeting the vestry, had aroused the speaker's hearers for his safety and the meeting and the vestry had aroused the speaker's hearers for his contents. By this time, the business with the Rev. Mr. Ward and a large excort of friends, who with great and the meeting their prey, Mr. Thompson lect the most of the most of freends, of the city of the most of t

The committee then went diligently to work to find how the appropriations could be still further pared. The sum of \$10,000 bad been appropriated for street paving. The committee concludation hobbits along without more paved streets far one many year, and that \$10,000 was shaved off. The sma of \$5000 bad was shaved off. 000 was shaved off. The sma of \$8000 had been granted for the building of new streets. In went the knife and that appropriation was clipped. This made \$18,000 of the necessary \$35,000 of saving. The school committee had asked for the modest little sum of \$55,600 and the financiers had granted 0. They now took \$4000 from that, and another \$4000 from miscellaneous expenses. The total saving when the committee adjourned at 2 o'clock in the morning was \$55,000. Sill the mayor was not satisfied and more will have to be shaved off in order to keep the taxes down.

down.

The present administration has in-herited a "dead horse" from its prede-essor to the tune of \$30,000, so that when the \$200,000 has been raised there will be available for present purpose-ouly \$170,000. To live within that sum will remise constant exercise of the will require constant exercise of the strictest economy. To most members of the city government it now appears like a feat impossible of accomplishment dut Mayor Whipple says it must and shall be done.
